

# CAÍQUE COELHO

Senior SDET · Quality Engineering & Test Automation · AI-Native QA (LLM agents)

São Paulo, Brazil | Relocating to UK, Netherlands or Spain (visa sponsorship required) | [caiquedpfc@gmail.com](mailto:caiquedpfc@gmail.com) | [linkedin.com/in/caiquecoelho](https://linkedin.com/in/caiquecoelho) | [github.com/caiquecoelho](https://github.com/caiquecoelho) | [caique-coelho.web.app](https://caique-coelho.web.app)

Portuguese (native) · English (professional working proficiency) · Spanish (intermediate) | Cypress.io Ambassador (Cy.Pronauts)

## PROFESSIONAL SUMMARY

---

Senior SDET with **9+ years in software engineering and 8+ in test automation and quality architecture**, across high-scale consumer products (QuintoAndar, Zé Delivery / AB InBev), a B2B marketplace (Inventa) and regulated fintech infrastructure (Raidiam, UK-headquartered). Own test strategy and frameworks end to end - **Playwright and Cypress in TypeScript**, unit to E2E, contract, visual and performance - plus the **CI/CD** that runs them. **Led a team of 6 SDETs**, contributor to the **Cypress core repository**, and builder of **LLM agents (Claude, AWS Bedrock, MCP)** that **cut release validation from ~2 hours to ~10 minutes**.

## KEY ACHIEVEMENTS

---

- **Release validation from ~2 hours to ~10 minutes** at Raidiam with a library of Claude Code agents wired to Jira, GitHub, Jenkins and Playwright via MCP.
- **~60% fewer flaky tests and ~50% shorter CI pipeline** at Zé Delivery by stabilising E2E tests and rebalancing the test pyramid.
- **Led a team of 6 SDETs** at Inventa and built its Cypress framework and release quality gates.
- **Open-source contributor to Cypress** (PR #28256) and **Cy.Pronauts** ambassador; side products used by **900,000+ people**.

## CORE SKILLS

---

- **Test Automation:** Playwright, Cypress (E2E + Component), Selenium, Appium, Robot Framework, Vitest, Jest, React Testing Library, Testing Library for Vue, Supertest, MSW.
- **API, Contract, Performance & Visual:** PACT, Postman, REST / OpenAPI validation, k6, Locust, Percy, BrowserStack, Sauce Labs, accessibility (axe).
- **CI/CD & Cloud:** GitHub Actions, Jenkins, GitLab CI, Drone, Docker, Terraform, AWS (SSM, KMS, S3), test parallelisation and selective execution.
- **AI-Native QA:** Claude / Claude Code, AWS Bedrock, LLM agents and multi-agent workflows, MCP servers, prompt engineering; Python, PyTorch.
- **Security & Standards:** OAuth 2.0, OIDC, FAPI, mTLS, PKI / JWKS, OpenID Foundation Conformance Suite, Open Banking / Open Finance, Open Insurance.
- **Languages & Tooling:** TypeScript, JavaScript, Python, Java, Kotlin, Ruby; Vue, React, Node; Grafana, Sentry, Kibana, SQL; Xray, qase.io, Jira.

## WORK EXPERIENCE

---

### Senior QA Automation Engineer (SDET) - Raidiam

Nov 2023 - Present | Remote from São Paulo, Brazil | UK-headquartered trust infrastructure for Open Banking and Open Finance

- Own test automation strategy, frameworks and tooling for Open Finance and Open Insurance **certification products**, validating **FAPI, OIDC and mTLS** flows against the OpenID Foundation Conformance Suite and OpenAPI specs.
- **Built AI-native QA tooling:** a library of **Claude Code agents** that generate test plans from Jira tickets and PRs, validate conformance logs, audit releases and triage failures into product bugs vs. test gaps, wired in through **MCP servers** - **release validation down from ~2 hours to ~10 minutes**.
- Lead web automation in **Playwright and Cypress with TypeScript**; migrated the E2E suite to TypeScript and rebuilt it around **cypress-grep** for selective runs and **Xray** for traceability on **GitHub Actions**.
- Rebalanced an E2E-heavy suite into a **proper test pyramid** by adding unit and component layers (Vitest, Jest, React Testing Library, Cypress Component Testing) and **Percy** visual regression.
- Built a repeatable **multi-environment onboarding process** for new client environments (**Terraform / AWS SSM**, parameterised **Jenkins** jobs) and automated API and certificate contract checks (PKI, JWKS, token endpoints).
- Mentor QAs across squads and drive testability in design reviews.

### SDET Lead - Inventa

Apr 2022 - Oct 2023 | São Paulo, Brazil | B2B wholesale marketplace

- **Led a team of 6 SDETs:** mentoring, development plans and technical direction.
- Designed the test automation strategy and built the **Cypress framework** for the web apps, with smoke and regression suites gating every release through **qase.io**.
- Ran **performance testing with k6 and Locust** and monitored production with **Grafana and Sentry**, finding bottlenecks before peak traffic.
- Owned defect triage with engineering, product and business analysts to keep releases on schedule.

## Senior Software QA Engineer - Zé Delivery (AB InBev)

Nov 2021 - Apr 2022 | São Paulo, Brazil | Brazil's largest beverage delivery platform

- **Cut flaky tests by ~60% and CI pipeline time by ~50%** by stabilising E2E tests and moving coverage down the test pyramid.
- Introduced **contract testing with PACT**, API tests with Postman, Joi and Supertest, and **performance tests with k6**.
- Matured the quality pipeline from requirements to regression and coached engineers on when to use each type of test; mentored junior QAs.

## Senior Software QA Engineer - QuintoAndar

Nov 2018 - Nov 2021 | São Paulo, Brazil | Latin America's largest real-estate rental platform (unicorn)

- Built and scaled **E2E and component automation with Cypress** through 3 years of hypergrowth, and **enabled developers to write their own tests**, scaling automation beyond the QA team.
- Defined and monitored **production quality metrics** (performance, reliability, scalability) with Grafana, Sentry, Kibana and Metabase.
- Owned risk-based test planning, exploratory testing and bug tracking end to end, keeping a high bar on UI, usability and accessibility.

## Android Developer / QA Analyst - Jera

Jun 2017 - Oct 2018 | Campo Grande, Brazil | Earlier: Software Engineering Intern, NTI UFMS (Nov 2016 - Jun 2017)

- Built and maintained native **Android apps in Java and Kotlin** (MVP / MVVM, Dagger, RxJava); before that, automated tests with **Selenium and Ruby** and defined acceptance criteria with customers.

## PRODUCTS, OPEN SOURCE & COMMUNITY

---

- **Cypress** (cypress-io/cypress) - PR #28256, fix for inverted tag and grep untagged. **huskyCI** (globocom) - PR #578, tools version check.
- **DISC Board** - founder; full-stack platform for DISC behavioural insights (Nov 2024 - Present).
- **Enneagram Test** - Android app and PWA, **400,000+ downloads**. **Retrospective Twitter** - PWA, **500,000+ users**.

## EDUCATION & CERTIFICATIONS

---

- **B.Sc. in Computer Science** - Universidade Federal de Mato Grosso do Sul (UFMS), 2013 - 2018.
- **Cy.Pronauts** - Cypress.io Ambassador Program · **Test Automation University** (Applitools) - 7,975 credits, Phoenix rank.
- **Artificial Intelligence** - Huawei (2021) · **Introduction to Machine Learning** - Duke University · **Scrum Foundation Professional Certificate (SFPC)**.
